Synopsis

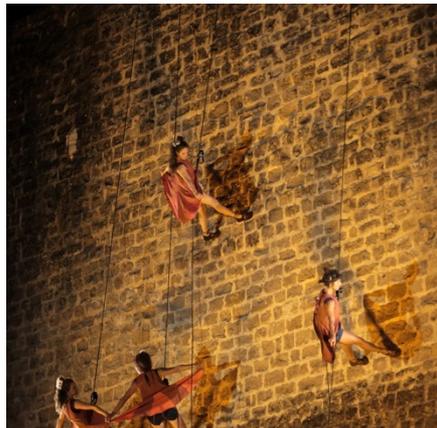

Four pieces for the four elements of nature.

Four bodies in suspension in four heartbeating times. Passing through each of the states of the basic elements that compose us as living beings and we find inside of us.

A reborn from the heartbeat of the earth, in a non stoping transformation.

It leads us to the water fluidity, then to enjoy the madness of the air, feeling the breeze caress. Finally it transported us to the power of fire, that seize upon our madness, revealing our inside savegeness.

This compose the piece “Entre cuatro tiempos” (Between four times). Four live musical pieces, originaly composed and performed that fit perfectly in the puzzle of vertical dance. Specially related to the four stations we live every year, in our planet.
